Entertainment

Balloon Wars

This program is a completely original strategy/arcade game that requires both thought and coordination. You must fly your leaky balloon across 20 screens of desert wasteland - avoiding and destroying attackers at the same time. Carefully balance your supply needs with your situation to reach the oasis. Requires Extended BASIC and a disk drive. By Chris Bobbitt.

NEW low price - now only \$4.95!

Column Attack!

The maniacal Flugelins want to invade Earth and turn it into a vast shopping center and fast food complex? Can you stop their evil plan to level the planet with power lasers?? An unadulterated, unabashed 11-level arcade game, **Column Attack** is joy-stick bending action from start to finish with great graphics and sound. Put your word processor aside and enjoy yourself for a few moments with this assembly language game. Requires 32K memory expansion and a disk system, and one of the following - Extended BASIC, TI-Writer or Editor/Assembler. By Chris Bobbitt.

New Release! - pure fun at only \$9.95!

Doom Games I

A set of four all-new games for the Tunnels of Doom module! Search for magic diamonds, find the keys of time, or even explore a famous department store in these wonderful hack n' slash epics. If you enjoy Tunnels of Doom, you'll love these games. Available on disk or cassette. Requires Tunnels of Doom module.

A real value! - \$7.95

Doom Games II

More great games for the Tunnels of Doom module! If you are addicted to the 3D animation, graphics, and intense action of Tunnels of Doom, you'll find these new games more than fit the bill. New graphics, monsters, treasures and magic mean hours and hours of enjoyment. Available on disk or cassette. Requires Tunnels of Doom module.

New Release! - Another great \$7.95 value

The Game-Pack

Two great arcade games by game master John Behnke (author of **TOD Editor**, **The Volcano Fortress**, and others). Thrill to intense arcade action with **Missile Wars** - can you save Earth? Explore an underground world in **The Haunted Mine II**! Both games on one disk with individual manuals. Requires Extended BASIC, 32K and a disk system.

A tremendous new price! - \$5.95!

High Gravity

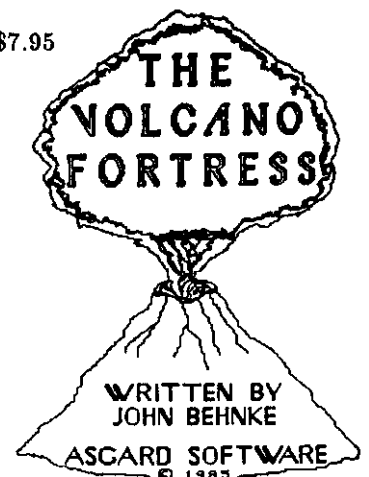

A truly amazing simulation of space! A space station is trapped deep in a solar system with crushing gravity fields. You have to shoot your unguided re-supply capsules to the beleaguered scientists on board, or else. This program is an excellent way to learn the physics of gravity and acceleration - a vivid aid for the physics student! All variables completely controllable, yet it is simple to use. Fast because it is in assembly. Requires 32K, a disk system, and either Extended BASIC, Editor/Assembler, or Mini-Memory. By Tom Wible.

A Great new price! 33% off!! - Only \$9.95

The Volcano Fortress

An excellent collection of five games for the Tunnels of Doom module by John Behnke, the author of **TOD Editor** - the program for creating Tunnels of Doom games. While TI may have forgotten about making games using the excellent 3D color graphics and sound of this module - we sure didn't! Available on disk or cassette. Requires the Tunnels of Doom module.

A great buy! - A value at \$7.95

Coming Soon!

Legends II: The Sequel

A completely new adventure for fans of the original *Legends*! Can your battle hardened party survive another encounter with Ashtar Creel? Or is it even Ashtar Creel? Designed for characters of levels 16 through 30, this game is a continuation of the *Legends* series. It features new spells, new graphics, new monsters and new places to explore. The graphics for the combat screen have been redesigned entirely to be even more three-dimensional, more colorful and more dramatic. If you enjoyed the original *Legends*, you'll appreciate the new challenges that await. By Donn Granros and Ed Johnson. Requires disk, 32K, Extended BASIC. The original *Legends* also recommended. Available by Feb. 1, 1989

A tremendous bargain! - only \$17.95

Old Dark Caves: The Lower Caverns

Donn Granros' popular *Old Dark Caves* series meets *Legends* in this fascinating new single-player adventure by the master programmer who has become synonymous with "adventures". You must explore this 50-level dungeon carefully, combating monsters (with spectacular 3D color graphics and animation), casting spells, and gaining gold and valuable magic treasures in order to survive the perilous encounters that lie even further ahead. *Old Dark Caves* fans will be familiar with the exciting "hack and slash" action that made that series so popular. *Legends* fans will recognize the colorful new graphics, and variety of monsters and spells. All players will be pleased to learn their characters can go on to even greater quests in *Legends* and *Legends II: The Sequel*. This game is the culmination of the *Old Dark Caves* series and serves as an introduction to *Legends*. Requires 32K, Extended BASIC and disk. By Donn Granros. Available Jan. 1, 1988

Inexpensive adventure action! - \$17.95

Legends

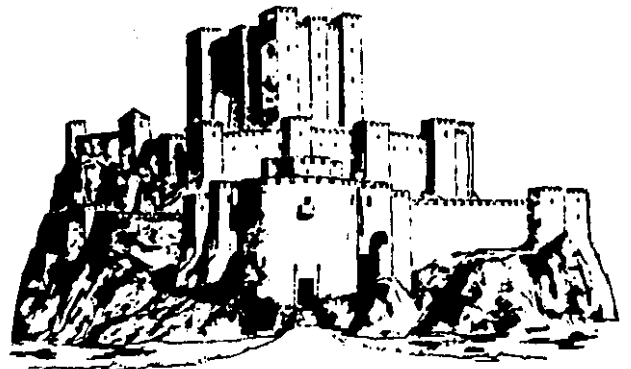

MICROpendium magazine called this the best graphics adventure for the TI-99/4A! *Computer Shopper* gave it a rave review. Dozens of user group publications have called it the best adventure around - better than *Ultima* for the Apple IIs. *The Chicago Times* said it was a reason to keep your 99/4A! This amazing animated graphics adventure takes up 2 disks, and will take months to solve. Guide four characters you create into the World of Legends - through the vast island and six dungeons. Fight monsters, find treasures, deal with the inhabitants and save this land from evil. Magic spells fly fast and furious while you fight the 50 distinct, animated monsters. Find clues, drink potions, visit the town of Wizard's Rock. If you like adventures, find out what everyone else is talking about! Includes 2 manuals, a reference card, and a new world in your computer. Requires 32K, a disk system and Extended BASIC. By Donn Granros and Ed Johnson.

A great new price - save 20%! - \$22.95

Oliver's Twist

A completely new adventure for the *Adventure* module! This adventure shows you that the *Adventure* module can still be used for fantastic adventures. Your task is to return 15 treasures to their rightful locations - but it isn't that easy. For one thing, you don't know where they belong! Can you do it without disturbing Oliver's Ghost? This text adventure is by the author of *Using the Adventure Editor*. Available on disk or cassette - requires the *Adventure* module. By Mickey Schmitt and Lynn Gardner.

New Release! - A bargain at \$9.95

Graphics

Artist Borders

Now, for the first time, easily add borders to your TI-Artist or Font Writer II pictures! **Artist Borders Volumes #1 and #2** each contain 40 sophisticated, fancy, classic and just fun borders that you can use to dress up a drawing, create a flyer or certificate, or add to practically anything that can benefit from a border. This collection is also entirely unique - there are no other border collections available for TI-Artist from any other manufacturer. Highly detailed, you'll use all borders over and over. Requires TI-Artist. By Robert Coffey and Paul Scheidemantle.

New Release! - Each volume only \$7.95!

Artist Fonts

Other art collections are like a grab-bag - some jewels but lots of things you neither need nor want. **Asgard Software** takes the guesswork out of buying pre-made art for use with TI-Artist or Font Writer II - we've spent a lot of time organizing our works so that you only have to buy what you need and want - not what someone else decides is what you need or want. This collection is a 5 volume series of fonts for use with any program that accepts typefaces in TI-Artist format. The **Artist Fonts** collection provides a wide variety of new fonts that can be used to enhance your documents or pictures. The vast majority of the fonts in this series are complete fonts with upper and lower case characters, numbers and special symbols: The volumes are as follows:

Volume #1: A collection of large fonts useful for titling. Also contains novelty fonts for interesting headlines and to add character to your work. By Ken Gilliland.

Volume #2-5: Four outstanding collections of smaller typefaces for use in desktop publishing, or just to get the most text on a line possible in your pictures. Each font is highly detailed and complete. Fonts are available in a variety of smaller sizes. The largest collection of smaller fonts available. **New Release!** By Paul Scheidemantle.

A tremendous value! - Each volume \$7.95, all five for \$34.95!

Artist Instances

This outstanding series of works is the most extensive clipart library for TI-Artist ever! Each volume in this comprehensive collection consists of large, detailed and well documented pictures stored in TI-Artist "instance" format. All can be readily used in your desktop publishing documents, as a basis for other pictures, and in flyers, calendars, certificates, or anything else that can benefit from a beautiful, large picture. These pictures were carefully chosen from thousands of others so that you can print them out on a page with the maximum resolution and darkness possible without them disappearing. Arranged thematically - only purchase the pictures you want in the category you want.

Volume #1 - Animals 1 Domestic and wild animals

Volume #2 - Animals 2 Familiar and rare animals

Volume #3 - Holidays 1 Help you celebrate those special days of the year

Volume #4 - Home A large collection of smaller pictures of personal objects, household items, etc.

Volume #5 - People 1 Famous and not so famous folks

Volume #6 - Computer A large collection of computer images

Volume #7 - People 2 Fantasy figures run amok here

Volume #8 - Animals 3 More incredible animals

Volume #9 - Holidays 2 More images for festive days **New Release.**

A Great Value! - Each volume \$7.95, any 3 for \$19.95!

Artist Enlarger

A "must-have" utility for anyone with TI-Artist or programs that use TI-Artist artwork. It seems the picture or font you want to use is never quite the right size - too thin, too tall, too fat, or just too large or too small. Now, with this utility you can quickly and easily enlarge, reduce, stretch or squeeze any font or picture as many times and in whatever order you like. Stretch a font wider and then enlarge it - reduce a picture and then make it taller. Take the guesswork out of page creation! Requires TI Extended BASIC, 32K and a disk system. By Howard Uman.

A valuable utility! - Only \$9.95

Font Writer II

The tremendous package of utilities for TI-Artist users! **Font Writer II** is the ultimate companion to TI-Artist - if you are a serious user you can't do anything serious without it! This package contains a font editor for creating fonts or instances in TI-Artist format, a font manager for merging, and editing fonts, a banner maker for creating banners of any length with pictures, conversion utilities for converting pictures and fonts to CSGD format and back, and a font formatter that allows you to take documents you create with TI-Writer and print the text in an infinite number of TI-Artist fonts, with pictures and borders - desktop publishing on your 99/4A! Do multiple page reports, advertisements and flyers, charts and much more. Includes an extensive manual, a disk of sample fonts and pictures, and its own version of TI-Writer. **Font Writer II** provides a complete environment for the teacher, student, businessperson, secretary or newsletter editor to create complicated documents. Requires 32K, Extended BASIC, a disk system and an Epson or compatible printer. By J. Peter Hoddie.

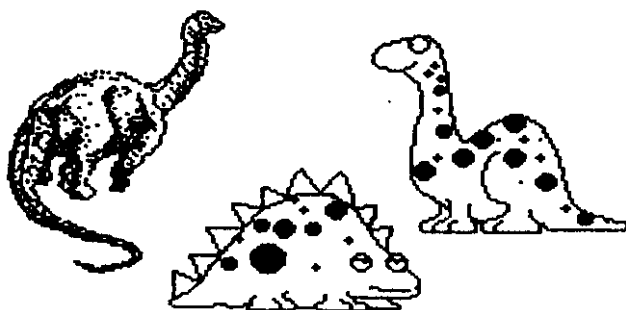

An incredible value! - \$22.95!

Disk of Dinosaurs

The most unique package ever! This two-disk set is an entertaining collection of highly detailed dinosaur pictures (both real and cartoon), prehistoric backdrops for placing your dinosaurs, a dinosaur hunting license, a dinosaur font, and even 4 dinosaur cartoons! All artwork is stored in TI-Artist format so that even little ones can put these pictures on the screen and print them out. This wonderful collection is both entertaining and educational, as well as a set of the best drawings of dinosaurs you've ever seen on a computer! For both children or adults, this is the perfect disk for young and old Dinosaur Enthusiasts. Requires TI-Artist, 32K and a disk system. The cartoons requires TI or Corcomp Disk Controller. A printer is recommended. By Ken Gilliland.

New Release! - \$12.95

GRAPHX Companion Series

This series of 4 packages for use with the popular GRAPHX program are the first companions ever for the 99/4A! These now-classic packages contain over 40 fonts, hundreds of pieces of clipart, pictures, animation sequences, borders, fill patterns, and much more! Very popularly priced - each volume in this series is worth much more. Requires GRAPHX.

Tremendous Value! - Only \$24.95 for the set!

GRAPHX Slideshow

This easy-to-use utility is the ultimate way to view pictures created with GRAPHX or with Max-RLE. Written in assembly, this program will display all the picture on the disk with a user defined pause between each, as well as the ability to jump to the next at a touch of a key. Fool-proof - it requires no programming. Even includes a library of new fonts for GRAPHX. Requires Extended BASIC or Editor/Assembler, 32K and a disk system. Written by Paul Charlton.

A good buy! - \$9.95

My-Art Coloring Book

For Geneve users only... a companion to the popular My-Art drawing program. My-Art is a good program for generating beautiful, high resolution picture on the Myarc Geneve. Its use of the mouse makes it a natural for young children to experiment with art. The **My-Art Coloring Book** takes this one step further with a collection of detailed drawings of popular cartoon characters and more - ready for My-Art users young and old to fill in with a favorite color, modify, or print out. These pictures are the result of hundreds of hours of work by Cynthia Becker, and a wonderful companion to My-Art. Requires a Myarc Geneve 9640, My-Art with Myarc Mouse.

A New Release! - \$9.95

Productivity

Calendar Maker 99

For the first time ever! Create beautiful, detailed picture calendars on your TI-99/4A. **Calendar Maker 99** is a simple to use program that allows you to create a month or a year calendar for anytime between 1600 and 2400, and then put up to forty small notes or pictures on each month. Even put pictures and text on the same day! Then, you can print the calendar out with a big picture at the top and the month in the middle, and a 1-13 line message at the bottom. Print a year 2 months to a page. **Calendar Maker 99** is flexible without being tedious to use - all you do is select all your fonts and border styles from the large collection of artwork provided. **Calendar Maker 99** is also friendly - it saves your calendar as you create it and allows you to pick up where you left off if you quit. You can also modify calendars after making them. It comes with a complete manual and 2 disks - and it is so easy to use even a young child can create a calendar. Ideal for teachers, students, businesspeople, or any organization that would like a beautiful, custom picture calendar without paying high printing and typesetting costs. Requires Extended BASIC, 32K and a disk system as well as an Epson or compatible printer. By Chris Bobbitt and Ed Johnson.

New Release! - \$19.95

Calendar Maker Utilities

The utility package that allows you to get even more out of **Calendar Maker 99**. This easy to use collection contains utilities for creating and printing samples of your own fonts, border styles, and month/year header files in English, French, German or Spanish. A utility is also provided for creating a universal date file - enter birthday and anniversary reminders once and merge them into as many calendars as you like. A perfect companion! Requires **Calendar Maker 99**. By Chris Bobbitt and Ed Johnson. **To be released Jan.1, 1989**

New Release! - \$12.95

Cassette Labeller

A simple but useful utility for creating cassette box inserts for your audio or computer cassettes. Much better than a database, this program prints a detailed list of the contents of your tape, complete with lines to cut and fold. Place inside your cassette boxes for neat, attractive organization! Requires Extended BASIC and an Epson compatible printer. Disk or cassette. By Tom Wynne

Form Maker 99

Now, for the first time, you can simply and easily create complicated business forms with your TI-99/4A! **Form Maker 99** turns your computer into a form-shop. Now you can create professional looking invoices, personnel forms, as well as any kind of business or school form quickly and easily without pen and ruler, or laborious work at a typewriter. Save forms and print as many copies as you like. Never pay the high costs of designing and typesetting forms again - what you save on one form will pay for this program over and over. Includes a thorough manual so that anyone can use the program, as well as sample forms on disk. Requires TI Extended BASIC or Editor/Assembler, 32K and a disk system. **To be released January 1, 1989.** By Ed Johnson.

New Release! - \$24.95

Press

How can you describe the best word processor for the 99/4A in one paragraph? **Press** is the first modern word processor for the 99/4A or the Myarc Geneve. TI-Writer was fine 7 years ago, but can't stand up to word processors of today. **Press** allows you to create single files as large as your disk space, allows you to type in columns on screen, it is "what-you-see-is-what-you-get" (bold text is bold on the screen, underlined is underlined), has hundreds of features from a built in word count to auto glossary and table of contents generation, headers, footers, a complete integral 100,000 word spelling checker, style sheets, and the list goes on for pages. **Press** is very fast (written entirely in assembly), and is as capable as any word processor for any other computer. It is easy to use - all options are available from pop-up menus (no command line or "dot commands" like TI-Writer), and it automatically configures itself for your system. It functions with any printer, and includes the ability to customize it for the special features of your own. It will use any extra memory it can find (including the Mini-Memory, an 8K or 32K supercart, even a Horizon RAM-disk), and will use the high-resolution screen and memory of the Geneve or any 80-column card! It comes with an extensive manual geared to beginners and people familiar with TI-Writer, in a professional binder, 4 disks, and a tutorial. It is by Charles Earl, the author of the Telco terminal emulator. **To be released November 25, 1988.**

New Release! - \$59.95

Recipe Writer 2.0

A database program specifically for recipes! Enter your recipes once and then print them on 3x5 cards or regular paper, or convert them to different serving sizes. Never re-print your recipes again - just print out as many copies as you have friends. Search for recipes by keywords. Allows up to 126 recipes per disk. If you collect recipes - this is the ultimate organizational tool! Requires 32K, disk, Extended BASIC or Editor/Assembler. Written by Warren Agee.

A useful program! - \$19.95

Electronic Gourmet

This 4 volume series of recipe books is the ultimate companion for **Recipe Writer 2.0** users! The **Electronic Gourmet** series consists of disks full of tested and well organized recipes. Volumes are arranged by category - **Volume #1 - Southwestern Fare**, **Volume #2 - Appetizers**, **Volume #3 - Main courses**, and **Volume #4 - Desserts**. Let your computer be your cook! Requires **Recipe Writer 2.0**

Novel companions! - \$5.95 a volume, any two for \$10.95

Stamp Manager

The database for philatelists! **Stamp Manager** is an inventory program for your stamp collection. It allows you to enter the Scott number, quantity, value, date purchased and condition of each stamp in your collection (up to 200 in an "album"), sort quickly by any of these and print a listing on any printer. Each "album" can include a description that is printed with the listing. Requires Extended BASIC, 32K, disk and a printer. By Chris Bobbitt.

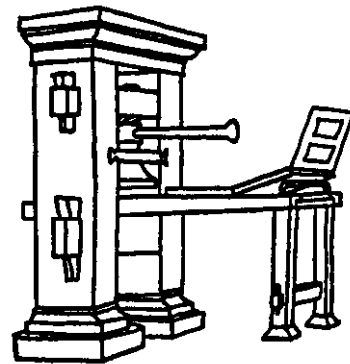

Save 33%! - \$9.95

Total Filer

A freeform database for text! Perfect if you want to enter a lot of text describing a collection of books, articles, even a genealogy. **Total Filer** allows you to enter keywords for each record and search an entire disk very rapidly. Great for research projects, school or work. Can easily be used as a rolodex or card file for business and home use. Very fast, it is written in c99, yet very easy to load and use. Comes with a complete manual. Requires Extended BASIC or Editor/Assembler, 32K and a disk system. A printer is recommended. By Warren Agee.

Save 25%! - only \$14.95!

Typewriter

A word processor is too much trouble for many small tasks - however a **Typewriter** is ideal for printing up short memos, labels, or notes, all things that are a lot of work with any word processor. **Typewriter** turns your computer into a fully functional electronic typewriter with centering, bold and underlined text, pica and elite, even right justification and a "memory" that allows you to correct what you just entered before committing it to paper. It's silly to buy a typewriter if you have a computer - all the components are there. But sometimes you need the flexibility of a typewriter - doing things "on the fly". With **Typewriter** all you have to do is plug in, put paper in your printer, and go! Available on module with or without a built-in printer port, also available on disk. **Typewriter** is a unique productivity tool! By Jim Reiss. To be released Oct. 1, 1988.

New Release! - Disk: \$19.95, Module: \$24.95, Module with printer port built in: \$39.95

Utilities

Batch-It!

Batch-It! brings batch processing to the 99/4A! Similar to macros, "batches" are little programs that allow you to automate other programs. **Batch-It!** will allow you to create programs to do things like run several programs in a row, take output from one and put it in another, even have it answer dozens of questions within a running program - all automatically! Batch programs can be very sophisticated - complete with variables, logic statements and flow control commands. **Batch-It!** is ideal for the "power user", or just about anyone that wants to automate their favorite word processor, terminal emulator, or database program. Since it runs from a Mini-Memory or Supercartridge (8K or 32K), it will run behind many commonly used programs - from BA-Writer to TI-Artist to Telco! Written by Charles Earl (author of Telco) and Tom Bentley. Heavily documented - comes with many sample batch files. Includes free newsletter subscription.

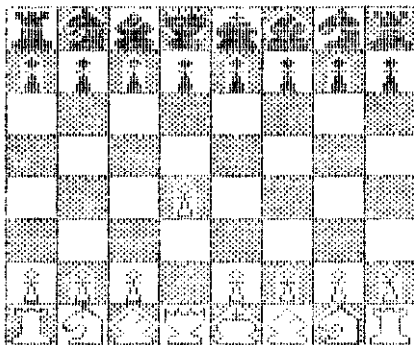

New Release! - \$19.95

Beyond Video Chess

The ultimate companion to the *Video Chess* module by Texas Instruments Inc.! **Beyond Video Chess** allows you to save and load chess games to disk, print screen or listings of moves to your Epson or compatible printer, and control the pieces with your joystick. It will even allow two people to use *Video Chess* as a playing board if you have a pair of joysticks! If you enjoy *Video Chess*, you'll wonder how you ever played it without **Beyond Video Chess**. Requires Extended BASIC, Editor/Assembler or Mini-Memory, 32K, a disk system, and either a Widget, load-interrupt switch, or Corcomp/Myarc disk controller. By Harry Wilhelm, author of **EZ-Keys**.

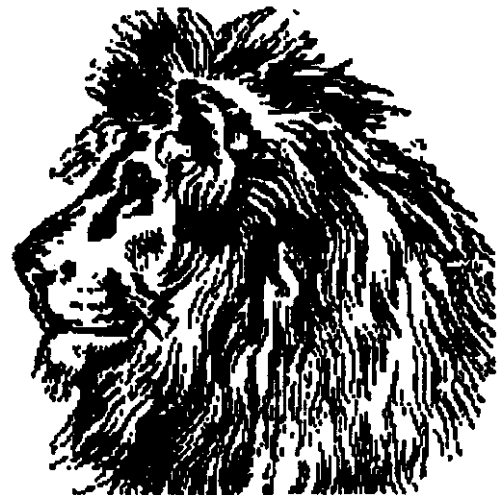

New Release! - \$9.95!

EZ-Keys Plus

EZ-Keys Plus is the ultimate programmers environment for Extended BASIC! This program opens up entirely new ways to write programs, and also helps you write them quickly and more efficiently. **EZ-Keys Plus** allows you to define macro keys as if they were little programs, complete with cursor movement keys and special key functions like "insert" and "delete". These macros can be up to 668 characters in length, and even call each other to perform larger, repetitive tasks. **EZ-Keys Plus** does more than that though - it will let you customize the character set and screen color of Extended BASIC, it can be set to automatically save your work at an interval of your choice, and it even contains a built-in disk cataloger and screen-dump, as well as automatic checksum checking of programs as you type them in! **EZ-Keys Plus** can even be used behind other Extended BASIC programs - even those with assembly. A built in macro editor makes macro creation a quick process, while an in-depth manual and it's own magazine provide thorough documentation. Magazine subscription free on purchase! Requires Extended BASIC, 32K and a disk system. By Harry Wilhelm.

An Exceptional Value! - \$14.95

Music Synthesizer

A wonderful program for the music novice! Features a very intuitive music creation process - just drop notes and rests on a page. Up to 360 3-note chords allowed per song - save and load 24 chords at a time in any order to create entirely new compositions. Non-threatening to the beginner, this program is ideal for young people - an excellent introduction to the possibilities of music. Requires 32K, Extended BASIC and disk. By Chris Bobbitt

A neat item! - \$9.95

PrEditor

The Programmers Editor! It might as well be called the "Premier Editor" - it is the best text editor for the 99/4A! Has dozens of features: it allows you to have 2 files in memory at once, block functions allows cutting and pasting between files, a disk cataloger, will use extra memory in a Supercart for buffering, fully configurable (assign any command to any key), view a file on disk at any time, instantaneous search & replace, user defined tab stops, window 1 to 40 columns at a time on an 80-column line, and much more! Even functions in 80-columns on a Geneve. If you write programs in c99, Fortran 99, Turbo Pascal, Assembly or even Extended BASIC - this is the ultimate programmers tool. Functions perfectly with **Batch-It!** - you can create interactive macros for doing even more complex editing functions. Also useful as a TI-Writer replacement - it is much faster and easier to use for experienced users. Will read and write standard D/V 80 text files. Includes a thorough manual and a configuration program. Requires 32K, Extended BASIC, Editor/Assembler or TI-Writer, and a disk system. By Tom Bentley.

A New Release! - \$19.95

Quick-Run

If you use Extended BASIC programs, you can't afford to be without this time-saving utility! **Quick-Run** takes a "snapshot" of a program while it is running and saves it to disk. At any future point when you run the "snap-shot" version it starts at the precise moment it left off! If you use this correctly, **YOU NEVER HAVE TO WAIT FOR A PROGRAM TO INITIALIZE AGAIN.** Way beyond using the pre-scan feature, **Quick-Run** actually reduces the amount of time it takes for a program to get its act together **AFTER** it starts running. With **Quick-Run** you can make your favorite applications start running from the main menu the instant they load from disk - never wait for them to load data files or calculate things again! Programs saved with **Quick-Run** may be distributed without royalties. Includes a complete manual with special programmers information - can be used equally well by programmers and non-programmers. Requires Extended BASIC, 32K and disk. By Travis Watford.

New Release! - \$9.95

RAM*Boot

Do you own a Myarc 128K or 512K card? If you do, you're probably tired of the lengthy process needed to set up the card for use. First you have to partition it and set it emulate a disk drive, then you have to load a disk manager, copy your floppy disks on to it, and **THEN** you can get to work. **RAM*Boot** does all that for you automatically and more! It is the first Myarc RAM-disk manager. It will allow you to set up as many disks as you like so that they will automatically set up your RAM-disk, copy the contents of one or more floppies to it, and then load and run any program you like from the RAM-disk! **RAM*Boot** will also allow you to back the RAM-disk back to floppy when you are done for the day, re-initialize the RAM-disk, copy any disk to another, and even run any program you like! It is the ultimate tool for the RAM-disk owner, just turn on your computer, press a key, and a few minutes later your application program is up and running. How did you ever own a Myarc RAM-disk without it?

A NEW Release! - Only \$9.95!

TOD Editor

The *ONLY* utility for creating your own games for the Tunnels of Doom module by Texas Instruments Inc.! A best seller in the Tenex catalog, this menu driven utility will allow you to change all the graphics, monsters, treasures, characters and weapons in the game - without removing the animated 3D graphics and intense action the module is known for! A complete 24-page user manual and tutorial make it easy for even the non-programmer to create a completely new game in 3-4 hours. **TOD Editor** received all A's in **MICROpendium** magazine, as well as terrific review elsewhere. The current version 3.0 even includes 2 games for the module. Almost all the games in **Doom Games I**, **Doom Games II** and **The Volcano Fortress** were created with this editor. A comprehensive utility by John Behnke. Requires 32K, Extended BASIC, and a TI/Corcomp disk controller (or a recently produced Myarc Controller) and disk drive.

A good value! - \$19.95

Magazines & Books

Asgard News

What is *Asgard News*?

Well, for the owner of one or more product by Asgard Software it is an indispensable source of tips, update notices, and information about new and related products. It tells you what's right and what's wrong about the software we publish, as well as what's up our sleeve next.

For the average user, it is a source of the latest news around the TI community and from the grapevine - news that doesn't make user group newsletters and the rest of the 99/4A press. It will keep you informed with the kind of information that effects you, and that you'd have to spend hundreds of dollars a month on telecommunications charges to get.

For the person in the market for new TI-99/4A related hardware, it is an unbiased, nuts and bolts reviewer of the latest in 99/4A technology. We'll dissect a new device *before* you spend hundreds of dollars for it. We also won't mince words - if it is a turkey, we'll call it a turkey. Finally, we'll talk about the benefits of a device, what it can do to meet your computing needs and make using the 4A more enjoyable, not bland feature lists.

For every TI-99/4A owner it is a forum where all the issues facing the 99/4A are discussed - from all angles. It is a hard-hitting magazine of opinion that deals with the hard issues - what is the significance of the Geneve? Is piracy killing software support? Where will be in 2 years, or 10? *Asgard News* shows a side of the 4A community you don't normally see, and what the "movers and shakers" are thinking.

In short, *Asgard News* is a news magazine for the TI-99/4A owner. We'll keep you informed, interested, outraged and excited about the many things that make up our world. If you are interested in the 99/4A - this magazine will interest you.

Subscribe now to this 16-32 page quarterly for only \$9.00 - 25% off our cover price. Canadian subscribers please add \$3.00, and all others please add \$4.00 for airmail delivery. Group subscriptions available on request. Act soon, however, because like the Commodore Vic-20, the Atari 800, the Adam or the PCjr, this offer may disappear.

The Adventure Guide

By Mickey Schmitt

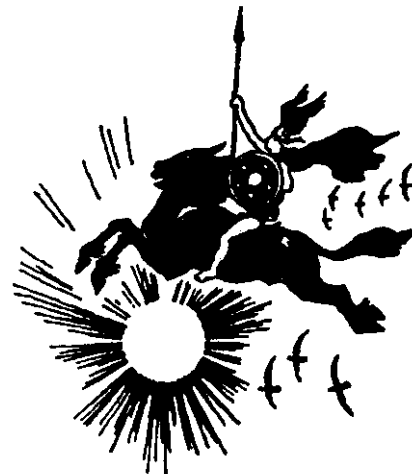

Adventure gaming enthusiasts rejoice! *The Adventure Guide* is a complete compendium of all adventures available for the TI-99/4A.

This indispensable guide to 99/4A adventure is the new bible for 4A adventure enthusiasts. The product of exhaustive research by Mickey Schmitt (noted adventure player and author), and our staff - we are proud to note that it is being produced by the largest publisher of adventure software for the 4A today, Asgard Software.

This jam-packed handbook lists every adventure available for the TI-99/4A, rates them by comparing them to similar adventures, includes information about what equipment is needed to run each program, provides detailed reviews of important adventures and adventure related programs, and information about where they can be obtained. Adventures are listed by type as well as by name, so that any adventure, or any series of adventures, can be found in a flash.

Did you know that there are hundreds of public domain and fairware adventures available for the TI-99/4A? This book will list the incredible wealth of inexpensive adventuring available, and tell you how to get at it. If you enjoy adventures, and would like to get more of them, you can't do without this fascinating and useful guidebook to the world of 99/4A adventures!

Like many of the adventures listed, this book is also inexpensive - only \$7.95 plus \$2.00 shipping & handling. Available by October 1988.

Why you can buy with confidence from Asgard...

You can buy software from *Asgard Software* with confidence because:

- **Asgard Software is one of the oldest active TI software manufacturers. We have been introducing new programs every year since 1983. We also support every program we've sold - even those that have been discontinued.**
- **Asgard Software is at the cutting-edge of software development for the 99/4A. This catalog alone contains over 25 new items, and more are planned for release in the coming year.**
- **In five years we have sold over 25,000 items and have thousands of satisfied customers. Our average customer purchases over 4 programs from Asgard.**
- **We have published programs by some of the brightest programmers for the TI-99/4A - including Warren Agee, John Behnke, Tom Bentley, Robert Coffey, Charles Earl, Ken Gilliland, Donn Granros, J. Peter Hoddie, Ed Johnson, Jim Reiss, Mickey Schmitt, Travis Watford, Tom Wible, Harry Wilhelm, and Tom Wynne.**
- **All Asgard Software products carry a lifetime warranty. If a disk fails within 90 days of purchase it will be replaced free of charge, and after 90 days for the cost of return postage.**
- **Asgard Software periodically enhances and upgrades many of our programs in response to user letters. Our updates are inexpensive (under \$5.00 on the average), and add new features to the program updated - not just bug fixes. We also mail announcements to all registered owners.**
- **Asgard Software does not copy-protect any of our software. This allows you to make personal copies and keep your investment safe. We trust our customers - we wouldn't have it any other way.**
- **We maintain accounts on GENie, CompuServe and Delphi, so that users can obtain help easily and inexpensively. We also have a technical support/order line (301-559-2429) that is manned in the evenings when our customers are home.**
- **Through our subsidiary Asgard Publishing, we publish *Asgard News* - a user magazine for Asgard Software products that will keep you up-to-date on recent updates, new ways to use our software, and announcements of related items. We are the only software manufacturer for the 4A to do this.**
- **Finally, Asgard Software publishes exclusively for the TI-99/4A and Myarc Geneve. We do not carry products for any non-compatibles. This assures you that we are dedicated above all else to the 99/4A and its owners, and not some other computers as well.**
