PAGE PRO 99 TIMES

VOL. 1 NO. 1 SUMMER 1989

PAGE PRO 99 RELEASED!

Rockville, MD—Asgard Software demonstrated its long-awaited Page Pro 99 at a press conference held at the Washington Convention Center. After the preliminary remarks, the President (and Chief Bottle-Necker) of Asgard, Carl Bobbitt, ran the program through its paces. The program's graphics capabilities (you can have up to 25 pictures of any size on a page at once), the ability to see the page on the screen before printing it, the ease-of-use (it's completely "what-you-see-is-what-you-get"), the multiple font features, and the line-drawing options.

Mr. Bobbitt did caution, "This isn't a full-on desktop publisher. Instead, we like to call it a 'page-maker'." But most attendees felt the program would let the user do most anything that a desktop publisher could, and much more easily too. The general opinion from those who had a chance to use the program was that being able to see everything on the screen as it would appear on paper was a leap beyond anything else for the 99/4A or Geneve 9640.

When asked attendees listed as reasons for purchasing the program many other things it offers including the ability to use standard TI-Artist artwork, the ability to type in any direction, the being able to print out the page as several dot densities, and also the ability to import TI-Writer files. All mentioned features were also liked by those who had a chance to use the program and its ease-of-use, and the general stability of the program (which users speculate was because of its lengthy testing period).

Copyright 1989 - Asgard Software

I LIKE IT TOO!

PROGRAM FEATURES

- 25 Pictures/page
- Large font and a small font on each page
- 2 linestyles/page
- See page on screen before printing
- Print in single, double or quad densities
- Type up/down/left or right
- Import TI-Writer files
- Save/load page
- Use TI-Artist Instances & Fonts
- And much more!
- Requires Disk, 25K KB or E/A modules

Entertainment!

ARCADE

Tris

NEW

An extremely addictive mind-teaser! In *Tris* you must rotate and move colorful, falling shapes to fill in the holes in the bottom of the screen. Completed rows disappear but incomplete ones just cause the screen to fill up! Simple to play but difficult to master, *Tris* will challenge and amaze for hours. This novel game is based on the popular Russian program that perpetually tops the best-seller lists for IBM and Apple software, but it has better sound effects and color than any version ever produced! By Jim Reiss and Asgard Software.

FE-14a - For TI-99/4A on Module only - \$24.95

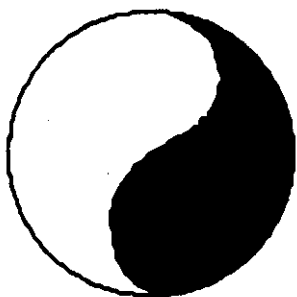

FE-15b - For Myarc Geneve 9640 and MDOS, on Disk - \$24.95

Karate Challenge

NEW

Evil Dragons have taken over the minds of the students and teachers at your Karate Dojo. In this fast-paced action game you must fight your former friends and teachers in order to get a chance to defeat the dragons in mortal combat. The amazing graphics of this game depict the many kicks and punches you can throw at your opponents in order to save the day. A challenge to thrill any Karate fan, as well as any game player! By Glenn Schworak. Requires 32K, Disk, joysticks, Extended BASIC or Editor/Assembler.

FE-08 - Disk - \$9.95

Mission Destruct

NEW

Evil robots have taken over the moon! You are on a mission to destroy as many moon base reactors as you can before the waves of Death Droids, Space Mines, and the evil Draks overtake your frail craft. In this fast, arcade style game you'll thrill to the sound effects and beautiful graphics as you dodge fireballs. A good old-fashioned "shoot 'em up" that will keep you playing for hours on end! By Glenn Schworak. Requires 32K, Disk, joystick, Extended BASIC or Editor/Assembler.

FE-11 - Disk - \$9.95

Karate Challenge and *Mission Destruct* together for only \$17.95 - 10% off! Order Item FE-18

Balloon Wars

Fly your leaky balloon across the desert on a mission from the British Secret Service! Fast action and 24 desert screens are complicated by enemies on the ground and lack of supplies. By Chris Bobbitt. Requires 32K, Disk, joystick, Extended BASIC.

FE-01 - Disk - \$4.95

**NEW PRICE* Save 50%*

Column Attack!

Stop the maniacal Flugelins from invading Earth, leveling it, and turning it into shopping malls! Their powerful lasers threaten to devastate the world. Can you save it in time? By Chris Bobbitt. Requires 32K, Disk, Extended BASIC or Editor/Assembler.

FE-02 - Disk - \$4.95

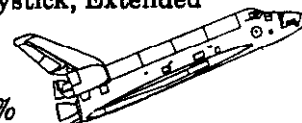

**NEW PRICE* Save 50%*

High Gravity

This truly amazing simulation of space will astound! Shoot your supply capsules through complicated gravity fields. An excellent game for students of physics. Simple to use, but you control all the variables of space flight. By Tom Wible. Requires 32K, Disk, joystick, Extended BASIC or Editor/Assembler.

FE-07 - Disk - \$7.95

**NEW PRICE* Save 20%*

ADVENTURES

NEW Legends II

This outstanding new adventure in the *Legends* series finds you shipwrecked with your fellow adventurers on the island of Femble, leagues from home. You have to explore this vast island, fight unknown monsters, explore a city and plumb the depths of dungeons in order to raise enough dough to buy passage home. This 3-disk adventure has excellent new graphics, new spells, monsters, and the wit and humor that made *Legends* so much fun. The original was called "The Best Graphics Adventure for the TI-99/4A" - the sequel is even better! By Donn Granros. Requires Extended BASIC, Disk and 32K.

FE-10 - Disk - \$17.95

Legends

This animated graphics adventure has been called the best of its kind for the TI-99/4A by every reviewer! Rated all "A"s by MICROpendium magazine, you must explore a vast island with dungeons, forests, swamps, mountains and inns. Along the way you fight monsters, cast spells, drink potions, talk to the inhabitants and generally have a good time! On two disks, *Legends* is the most incredible adventure ever done for the 99/4A. Guide your party through perils you can't even guess at. By Donn Granros and Ed Johnson. Requires Extended BASIC, 32K, Disk

FE-09 - Disk - \$22.95

Legends and *Legends II* together
for only \$37.95! Save \$3.00!

Order item FE-19.

NEW Doom Games III

Another volume in our immensely popular series of games for the Tunnels of Doom Module - thrill to "The Search for the True King" by Ken Gilliland! A must for the TOD player! Tunnels of Doom module required.

FE-05a - Cass. - \$7.95
FE-05b - Disk - \$7.95

Five Behnke games! - FE-13a - Cass. - \$7.95
FE-13b - Disk - \$7.95

NEW Zoom Flume

In this new adventure from Lynn Gardner, co-author of *Oliver's Twist*, you are in your bathing suit at the water park. You only have so much money to spend - so spend it wisely! Ride the Super Slide, speed down the Zoom Flume, try out the Tarzan Trolley or Bumper Boats. Surf's up! Requires the Adventure module.

FE-17a - Cass. - \$7.95

FE-17b - Disk - \$7.95

NEW Witch's Brew

An excellent introductory game for the Adventure module. In *Witch's Brew* a witch has let loose spells across the land. Can you find the witch and remove the spells? By David Bishop. Requires the Adventure module.

FE-15a - Cass. - \$7.95

FE-15b - Disk - \$7.95

NEW Wizard's End

A first for the Adventure module - a multi-player game with monsters, spells and treasure in the traditional Dungeons & Dragons' mold. For the advanced player - this game is a must for the serious adventure player. By David Bishop. Requires the Adventure module.

FE-16a - Cass. - \$9.95

FE-16b - Disk - \$9.95

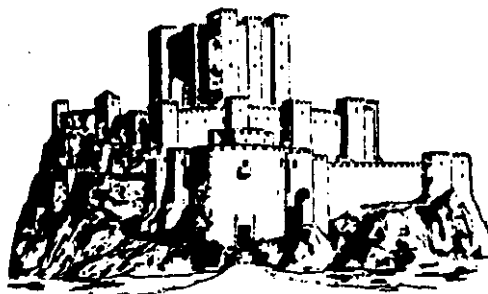

Oliver's Twist

Can you return the 15 treasures to their rightful places without disturbing the ghost of King Oliver? A fascinating adventure from Mickey Schmitt and Lynn Gardner.

FE-12a - Cass. - \$7.95

FE-12b - Disk - \$7.95

NEW PRICE Save 20%!

Graphics!

Artist Borders

For the first time, easily add borders to your TI-Artist or TI-Artist Plus screens! Each volume in the *Artist Borders* collection contains between 30 and 40 finely detailed borders for use in all your works. Make certificates and signs easily with the use of these fascinating borders. Each volume was hand-crafted by well known artists Paul Scheidemantle and Robert Coffey. TI-Artist or TI-Artist Plus, 32K and disk are required. A printer is recommended.

***NEW PRICE* Save 10%!**

- FG-01a Artist Borders I - Disk - \$6.95
- FG-01b Artist Borders II - Disk - \$6.95
- FG-01c Artist Borders III - Disk - \$6.95
- FG-01d Artist Borders IV - Disk - \$6.95

All Five - \$29.95!

Order Item FG-01f

Artist Fonts

Other art packages are like a grab-bag - some jewels but lots of things you neither want nor need. If you want TI-Artist fonts, why buy a package full of fonts, pictures and everything else? Now you can purchase fonts by themselves in our outstanding *Artist Fonts* series! These fonts were all drawn by hand by some of the best 99/4A artists today - including Ken Gilliland and Paul Scheidemantle. The vast majority of the fonts in this series are complete fonts - including numbers, symbols and all uppercase and lowercase letters. Don't settle for anything less! All require a disk system with 32K.

***NEW PRICE* Save 10%!**

- FG-02a - Fonts 1 (large fonts) - \$6.95
- FG-02b - Fonts 2 (medium) - \$6.95

Picasso Borders

A borders package for the Picasso drawing program - *Picasso Borders* contains over 50 beautiful borders! By Paul Scheidmantle. Requires Picasso 2.0, Disk, 32K

FE-11 - Disk - \$7.95

Picasso Enlarger

A program to enlarge and reduce Picasso pictures, "ghost" a picture (make it appear "ghostly"), and import TI-Artist instances directly into Picasso pictures. This utility package is a "must" for Picasso users! Requires Picasso, 32K, Extended BASIC and disk.

FE-12 - Disk - \$9.95

Picasso Utilities

This package of utilities will let you get more out of Picasso! *Picasso Utilities* includes an External Print utility that prints "camera-ready", high-quality copies of your Picasso screens, as well as a utility for typing on your Picasso screens in large fonts. Requires Picasso, 32K, Extended BASIC, Disk and an Epson compatible printer.

FG-13 - Disk - \$9.95

Picasso 2.0

Picasso 2.0 is the commercial version of the fairware classic! Picasso is an excellent drawing program that lets you create huge screens up to 480 x 342 in size - over twice the size of TI-Artist! An excellent zoom and dozens of great features make it one of the most usable drawing programs around. *Picasso 2.0* adds icons and many new window functions. Compatible with TI-Artist. Requires 32K, Disk, Extended BASIC or Editor/Assembler and an Epson compatible printer.

FG-14 - Disk - \$14.95

Using Picasso

The definitive book on using ALL versions of Picasso! This book, by well-known author Harry Brashear, tells you in depth, with many fascinating illustrations, how to use Picasso for everything from drawing to desktop publishing! Tells you about all the useful functions of the program too. An essential guide for Picasso users. 40 Pages. Requires a version of Picasso.

FT-05 - Text - \$5.95

GRAPHX Companion

A 7-disk package! - FG-08 - Disk - \$19.95

GRAPHX Slideshow

Slideshow Utility and fonts! - FG-09 - Disk - \$5.95

Disk of Dinosaurs

A most unique package for dinosaur lovers! This two-disk set is an entertaining collection of highly detailed dinosaur pictures, prehistoric backdrops for pasting the dinosaur pictures on, a dinosaur hunting license, a dinosaur font and even dinosaur animation shorts! As educational as it is entertaining - this is for Dino-Enthusiasts of any age! Requires 32K, Disk, a Corcomp or TI disk controller, and Extended BASIC. TI-Artist recommended. By Ken Gilliland.

FG-05 - Disk - \$9.95

**NEW PRICE* Save 15%!*

Disk Of Pyrates

A fascinating 4-disk package by the author of *Disk of Dinosaurs*! *Disk of Pyrates* is a veritable cornucopia of Pirate artwork, Pirate games, Pirate music, Pirate animation and Pirate history. This extensive package is as graphical as it is entertaining and educational. A must for the pirate fan! By Ken Gilliland. Requires Disk, 32K, TI or Corcomp Disk controller, and Extended BASIC. TI-Artist recommended.

 FG-06 - Disk - \$14.95

My-Art Coloring Book

A two-disk companion to the popular My-Art Drawing program! Electronic coloring book for children! Requires Geneve 9640 and My-Art. By Cynthia Becker.

FG-10 - Disk - \$9.95

Productivity!

Press

Press is the best word processor for the TI-99/4A - bar none. It is the first all new, full-featured word processor developed for the 99/4A or Myarc Geneve 9640 in 7 years! *Press* allows you to create files as large as your disk space, with up to 256 columns per page, and as many newspaper-style columns on a page as desired. *Press* is entirely "what-you-see-is-what-you-get" - you see all formatting, including Bold, Italics and Underline text on the screen exactly as you you'll see it on the page! No longer will you have to use complicated "dot" commands in order to justify or center your text. *Press* supports hundreds of features from a 100,000 word integrated spelling checker to multi-line headers and footers, macros, built-in disk manager, complete mouse and joystick editing, and the list goes on and on! *Press* is very fast - written entirely in assembly - and can utilize virtually every piece of hardware designed for the 99/4A. Use Horizon RAM-disks as extra memory for the program and text buffers; use 80-column cards, Supercarts, GRAM-devices and the list goes on and on! *Press* will also function with any printer. It comes with an extensive manual in an "IBM-Style" binder that is geared towards both the beginner and the professional user. *Press* is the product of the largest software development effort for the TI-99/4A since it was discontinued, and is by Charles Earl (the author of Telco). It is the one to which all will be compared. Requires 32K, 2 Disk drives. *Expected Release Date October 1st.*

FP-08 - Disk - \$59.95+\$5.00 extra S&H

Recipe Writer

Recipe Writer is the database designed specifically for recipes! Enter its ingredient list and instructions once, and later print the recipe out on 3x5 cards or regular paper, convert to different serving sizes and even search by keywords! Requires Disk, 32K, Extended BASIC or Editor/Assembler. Printer recommended. By Warren Agee.

FP-09 - Disk - \$14.95

Electronic Gourmet Companions

Vol #1 - Southwestern - **FP10a** - \$4.95

Vol #2 - Appetizers - **FP10b** - \$4.95

Page Making!

Page Pro 99

NEW

Page Pro 99 is the remarkable page making program for the TI-99/4A or Myarc Geneve 9640 that allows you to see and create an entire page, with graphics, lines and fonts, all at once! *Page Pro 99* is fast (written in assembly), easy-to-use (with on-screen prompts, a TI-Writer Editor, etc.), powerful (with dozens of features - many unique to this program), compatible (works with TI-Artist compatible artwork and fonts), and fun to use (you see the page on the screen exactly as it will be printed). *Page Pro 99* will allow you to paste up to 28 pictures of any size and shape on the page at a keypress, type in any direction, draw in multiple linestyles, and even type in different fonts. You can import text files from TI-Writer, create two-column text for newsletters with the included utility, and even print out pages in everything from "rough draft" up to "reproduction quality"! Well tested and thoroughly documented (with 2 manuals and a disk full of sample pages, fonts and pictures!), *Page Pro 99* will work with anything from a 99/4A with a single drive up to a fully loaded Geneve 9640. Geneve specific version included at no extra charge! By Ed Johnson. Requires 32K, Extended BASIC or Editor/Assembler, Disk, and an Epson compatible printer.

FP-05 - Disk - \$24.95

Page Pro Fonts

NEW

Page Pro 99 is compatible with TI-Artist fonts, but we commissioned artist Paul Scheidemantle to produce two packages of fonts specifically designed for *Page Pro 99*! Each volume of *Page Pro Fonts* is the result of hundreds of hours of hand crafting - each of the 25 fonts on each disk was hand-drawn from scratch with pixel precision to make your pages look as good as possible! Requires *Page Pro 99* and a disk system.

FP-07a - Page Pro Fonts #1 - \$7.95

FP-07b - Page Pro Fonts #2 - \$7.95

Both volumes only \$14.95! Order item FP-07c

Page Pro Pics

NEW

While *Page Pro 99* is compatible with thousands of pictures available for TI-Artist - many of them are so small they disappear on the page! Because you'll want to put large pictures on *Page Pro 99* pages, we created *Page Pro Pics* - 7 volumes containing over 300 pictures divided by subject. Each picture is highly detailed and selected from thousands! Requires *Page Pro 99* and a disk system.

FP-06a-f - Page Pro Pics #1-7 - \$6.95 each

All 7 volumes only \$39.95! Order item FP-06g

For Information or to order Call (703)255-3085

Calendar Maker 99

For the first time ever - create big, beautiful picture calendars on your TI-99/4A! *Calendar Maker 99* is a powerful program that MICROpendium magazine called "one of the easiest to use programs ever for the TI-99/4A". Create a month or year calendar for any year from 1600 to 2400 A.D. with pictures and text on individual days, a big picture on the top of the page and even a 1-13 line message on the bottom! Customize your calendars with different fonts and linestyles. *Calendar Maker 99* is flexible without being tedious to use - simply follow the on-screen instructions while creating your calendar. The program saves your work automatically after every step so that you can stop at any time and continue later. You can even modify calendars later after printing them! Even a young child can create calendars with this program. Comes on two disks with an extensive manual. Requires Extended BASIC, 32K, Disk and an Epson compatible printer. By Chris Bobbitt and Ed Johnson.

FP-02 - Disk - \$19.95

Calendar Maker Utilities

A utility package that lets you do even more with *Calendar Maker 99*! Design new fonts and linestyles with an easy-to-use editor. Create header files from any TI-Artist font in English, German, French, Spanish and Swedish. Create "Universal Date Files" with oft-used text so that you only have to enter in birthdays and holidays once. Even print out samples of all your fonts! Requires *Calendar Maker 99*, Disk, 32K and Extended BASIC. By Chris Bobbitt and Ed Johnson.

FP-03 - Disk - \$9.95

***NEW PRICE* Save 20%!**

Cassette Labeller

A simple but useful utility for creating cassette box inserts for your audio or computer cassettes! Much better than a database - this program prints a detailed list of the contents of your tape complete with lines to fold and cut along. Place inside your cassette boxes for neat, attractive organization! Requires Extended BASIC and Epson compatible printer. By Tom Wynne.

FP-03 - Cass./Disk (specify) - \$9.95

Stamp Manager

A dedicated database for stamp collectors - enter the Scott number, data purchased, condition, value and quantity of all your stamps. Sort quickly and print into extensive reports. Unlimited capacity. Requires Extended BASIC, 32K, disk and a printer. By Chris Bobbitt.

FP-12 - Disk - \$9.95

Typewriter 99

Typewriter 99 is the remarkable program that turns your computer into a full featured, modern electronic typewriter! A word processor is too much for some jobs - short notes, labels, addressing envelopes, etc. *Typewriter 99* is perfect for that stuff - all assembly it loads in seconds from your favorite modules (or in its own module), and allows you to begin typing immediately! Features bold and underline typing, text justifying and even auto-centering! Set margins on the screen, tabs and even see the 6 lines previously typed. It's silly to buy a typewriter if you have a computer - you have everything you need. Now *Typewriter 99* makes it all possible! All versions require a printer (compatible with all) - disk versions require 32K. By Jim Reiss.

FP-14a - TI-99/4A Disk version- \$14.95

FP-14b - TI-99/4A Module - \$24.95

FP-14c - Geneve 9640 MDOS version - \$14.95

Music Pro

The amazing new *MUSIC PRO*cessor from David Caron and Lucie Dorais of the Ottawa TI-99/4A Users Group! *Music Pro* allows you to type on a staff directly from sheet music, then compile and play the music. The most capable music program for the TI-99/4A, *Music Pro* can transpose phrases, and features full editing functions. Compile into assembly for fast play and even stand-alone use in games or by itself! Winner of the 1988 Programming Contest, *Music Pro* is an outstanding program for the musician or music student. Even print out your sheet music on an Epson or compatible printer! Requires 32K, Disk and Extended BASIC. *For the TI-99/4A only!*

FP-04 - Disk - \$17.95

Total Filer

Total Filer is a free-form database for text. Perfect if you want to enter a lot of data about a collection of books, articles, or even a genealogy. *Total Filer* allows you to do a rapid keyword search of any item in your database. Great for research projects, or even as an electronic rolodex. By Warren Agee. Requires Disk, 32K and Editor/Assembler. Printer optional.

FP-13 - Disk - \$9.95

***NEW PRICE* Save 33%!**

Utilities!

The Animator

A complete frame-by-frame animation package for the TI-99/4A! *The Animator* is an extensive program that allows you to create multiple animation sequences one frame at a time, and then script them together in a complicated animation sequence. You can import TI-Artist instances as frames, and even save animation sequences so that they can be used in your Extended BASIC programs! *The Animator* is a complete animation editor for Extended BASIC programmers, as well as the animation buff. Includes example files and thorough documentation. By Brad Snyder. Requires Extended BASIC, 32K, Disk. Available Nov. 1, 1989.

FU-01 - Disk - \$19.95

Beyond Video Chess

The ultimate companion to the *Video Chess* module from Texas Instruments Inc.! *Beyond Video Chess* allows you to save and load your chess games to disk, print the game-board or listings of your moves to the printer, and even control the pieces with joysticks. Two people can even use the cartridge as a chess-board! If you enjoy *Video Chess*, you'll wonder how you ever did without *Beyond Video Chess*. Requires the *Video Chess* module, 32K, disk, and either Extended BASIC, Editor/Assembler or Mini-Memory, and either a widget, load-interrupt switch or Corcomp/Myarc disk controller. By Harry Wilhelm - author of *EZ-Keys Plus*.

FU-03 - Disk - \$9.95

Pre-Scan It!

Pre-Scan It! takes any Extended BASIC program and inserts pre-scan commands - making it start more quickly. *Pre-Scan It!* also makes your Extended BASIC programs more efficient by using special tricks in the XB module. *Pre-Scan It!* even works with other versions of Extended BASIC! Requires 32K, Disk and TI Extended BASIC. By J. Peter Hoddie.

FU-08 - Disk - \$9.95

EZ-Keys Plus

EZ-Keys Plus is the ultimate Extended BASIC programmers environment! This program gives you entirely new ways to write programs, as well as enhances your own programs and those of others. *EZ-Keys Plus* allows you to define keys to be "macros" - which can be short strings of text, long ones, and even large blocks of key commands and text! Unlike other macro programs, *EZ-Keys Plus* lets you put function and control key commands in your macros, and have them execute just like little programs! Macros can be up to 668 characters in size and even call each other! *EZ-Keys Plus* will also allow you to customize your XB environment - your screen colors, your cursor and even your character set! Set the program to automatically save your program as you write it. A built-in disk cataloger and screen-dump function make it even more useful and convenient! Even automatic check-sum is available. All "A"s from MICROpendium. An in-depth manual makes it easy to use. Requires TI Extended BASIC, 32K and Disk. By Harry Wilhelm.

FU-04 - Disk - \$14.95

TOD Editor

The only editor for making your own Tunnels of Doom games! This classic by John Behnke is fully documented, and menu-driven so it's easy to use. It has dozens of powerful options - use *TOD Editor* to change everything from the monsters, to the graphics, to the story and more! Requires 32K, Disk, Extended BASIC.

FU-11 - Disk - \$14.95

NEW PRICE Save 25%!

Batch-It!

The batch-file processor for the TI-99/4A or Geneve - *Batch-It!* allows you to automate many tasks! *Batch-It!* is to assembly language as *EZ-Keys Plus* is to Extended BASIC - it allows you to write and run batch routines that add macros to your E/A 5 programs, add help files, execute other programs from within running ones, and more! *Batch-It!* is actually a programming language that creates programs that run while your other program is running. Extremely sophisticated, this is an essential tool for the Assembly, c99 or Fortran programmer, as well as useful for knowledgeable users. Use behind some text editors, terminal emulators, databases, drawing programs, disk managers and utility programs! Requires 32K, Disk, and Editor/Assembler or Mini-Memory. Written by Charles Earl and Tom Bentley.

FU-02 - Disk - \$19.95

Quick-Run

This is the ultimate speed-up utility for Extended BASIC! *Quick-Run* takes a "snap-shot" of a running program, and saves it to disk. Later, the "snap-shot" can be run and the program will begin exactly where it was when the "snap-shot" was taken! Now you can eliminate long pre-scan times as well as long setup times forever! Other programs can only eliminate the time it takes before a program runs, *Quick-Run* can actually eliminate the time needed for a running program to get around to doing what it is you need to do. *Quick-Run* is also a tool-box of routines for Extended BASIC programmers that will let you chain programs and have a shared data pool between them - no longer will you have to save variables between parts of a program! Requires Extended BASIC, 32K and Disk. By Travis Watford

FU-09 - Disk - \$9.95

RAM*Boot

The last word in utilities for the Myarc 128K/512K card! *RAM*Boot* is a setup utility and RAM-disk manager for Myarc RAM-disk owners that you will wish had come with the card. First thing, *RAM*Boot* eliminates the tiresome setup process for the card - it will automatically partition the RAM-disk, copy your programs to it, and run any program for you without you having to do anything! After doing that *RAM*Boot* installs itself on your RAM-disk so later you can have it save your work back to floppy or even re-initialize your RAM-disk if it gets corrupted. *RAM*Boot* is unprotected so you can have multiple set-up disks. Requires Extended BASIC, Disk and a Myarc 128K/256K/512K card. By Travis Watford.

FU-10 - Disk - \$9.95

PrEditor

PrEditor is the "Programmer's Editor" for the TI-99/4A and Myarc Geneve 9640. Not a replacement for TI-Writer or the Editor/Assembler editor but an all-new editor written from scratch, *PrEditor* is for people who write code in c99, Assembly, Fortran or any other language for the 4A. Among other things, *PrEditor* will let you have two files in memory at once and cut and paste between them, it uses block-oriented and not line-oriented functions (you select a block of text and then move/copy/delete it), will let you view a file on disk, has instantaneous search & replace built in, will window 1-40 columns at a time on an 80-column line, supports 80-columns on a Geneve or properly equipped 99/4A, and so on. *PrEditor* can even be permanently configured - you can define the screen colors, the memory usage, and even the key assignments for all the functions ahead of time! Uses standard D/V-80 text files and includes an extensive manual and reference card. Requires 32K, Disk, and either Editor/Assembler, TI-Writer or Extended BASIC. By Tom Bentley.

FU-07 - Disk - \$19.95

Power Tools!

NEW Pix Pro

The "Super-Converter" to meet all your graphics needs! There are dozens of different graphics formats in use that together constitute a veritable Tower of Babel - many times pictures are available in one format but can't be found in another. Sometimes you need to use 2, even 3 different conversion programs to get a picture from one format to another - if at all. Now, for the first time ever, this simple-to-use utility gives all your programs access to the entire library of pictures available for the 99/4A and 9640! With *Pix Pro* you can convert pictures stored in GRAPHX, TI-Artist Picture, Instance, RLE, Picasso, Page Pro, MacPaint and other formats into most any of the above. Store a MacPaint or Picasso picture in TI-Artist Picture format, convert a GRAPHX screen to Instance format, go from RLE to Picasso, and do most any other conversion you can dream of, all easily and at Assembly speed! *Pix Pro* will even let you save a full-page MacPaint as a full-page Page Pro! Full color support is included. This is the essential tool for all desktop publishers! Requires 32K, Disk, Extended BASIC or Editor/Assembler. By Jim Reiss.

FU-06 - Disk - \$14.95

NEW HardMaster

HardMaster is the most capable disk sector editor for the Myarc HFDC! A sophisticated program with a powerful command-line interface, *HardMaster* is oriented towards helping you find your data as well as your files. It features a powerful editor that will let you edit a sector in hexadecimal or ASCII, a Quad-Editor that will let you edit 4 sectors at once, the ability to dump a range of sectors in both ASCII and hex to a printer, a directory function which lists the sectors a files header and data occupy, a powerful search function that will search by both a string or a hex number, a TREE function that gives a listing of all your directories and their associated files with sector information for each, the ability to dump the bitmap or sector allocation table to a printer, and much more! Even edit 1.44Mb floppies! If you have a hard-disk, this program will pay for itself the first time you repair a file, or recover a lost directory. Compatible with the Geneve and the TI-99/4A. Requires 32K, Editor/Assembler and a Myarc HFDC. By Colin Christensen.

FU-05 - Disk - \$14.95

Publications!

The Adventure Reference Guide

The Adventure Reference Guide is a complete reference for the TI-99/4A Adventure enthusiast! This extensive compendium, the product of over a year of research, lists the over 200 adventures available for the TI-99/4A. All adventures are rated alphabetically as well as by type, and listings include ratings, equipment needed to run the programs and where they can be found. Detailed reviews are included of the best games and most important adventure utilities. If you like to play adventure games, this book will show you the more than 100 adventures you can find in the public domain! *The Adventure Reference Guide* lists the incredible wealth in inexpensive adventuring available for our machine, and how to get it. By Mickey Schmitt. 80 pages.

FT-03 - Text - \$12.95 + \$2.00 S&H

The Orphan Survival Handbook

A timeless reference by Ron Albright and Disk Only Software, *The Orphan Survival Handbook* is an extensive collection of the best articles published in the last several years worth in user group newsletters. Every subject from programming to word processing to telecommunications is covered in depth. An invaluable reference by users for users. 150 Pages.

FT-04 - Text - \$9.95 + \$2.00 S&H

Asgard News Back Issues

Limited quantities of back issues of *Asgard News* are available. Issues Vol.1, No.3, No.4, and Vol.2 No.1 are available for \$3.00 plus \$.75 S&H.

FT-01a - Text - \$3.00 each

Asgard News

Asgard News is many things. It's a hard-hitting, timely news magazine for the TI-99/4A and Geneve user that gives you the complete picture - who's up and who's down. Who's working on what, and when it'll be available. Who's arrived and who left. If you ever wanted to find out what the "movers and the shakers" in the 99/4A world are doing, this magazine is for you.

Asgard News also gives you important consumer information. Our authors discuss the many programs available for the 99/4A, and which is best for which application. Within our pages you'll find specific recommendations, as well as general discussions of new products, and new things you never knew our little computer could do.

This magazine also touches on the hard issues facing the TI-99/4A world. We've discussed the State of the User Group, as well as pondered in our pages the future direction of software and hardware development for the machine. *Asgard News* will tell you where the 4A community has been and give you predictions as to where we might go.

Asgard News is also a resource for the 4A user. We've published extensive, up-to-date lists of vendors, user groups and more. In the coming issues we'll provide even more valuable lists that you'll find indispensable. Every issue of *Asgard News* is printed on quality paper that will last through years of hard use.

For the novice or inexperienced user, *Asgard News* is an invaluable collection of hints, tips and tricks on using your 99/4A. Our acclaimed "Beginner's Corner" explains all of those difficult computer terms and concepts in depth, in language the average person can understand. Our "Timely Tutorials" give step by step methods on using popular programs.

Finally, for the user of Asgard Software products, *Asgard News* keeps you up-to-date on bug reports, recent releases, and the current versions available of all our products.

All in all, each information-packed issue contains the kind of information you'd have to spend months or even years researching. It is written and edited by 99/4A veterans with a combined total of almost 30 years of experience with this the machine, and over 5 years of experience with the Geneve. We answer your questions, point to new directions, and show you how you can do more with what you have.

For a limited time only, subscribe to this acclaimed magazine for only \$9.00 for 4 issues - \$3.00 off the cover price for 4 issues. Canadian subscriptions are available for \$12.00 U.S., and Airmail subscriptions are \$16.00. Group rates are available on request.

FT-01 - Text - \$9.00/\$12.00/\$16.00 see above.

NEW Home Publishing on the TI-99/4A

The TI-99/4A has never been known as an outstanding machine for graphics. This book goes a long way towards correcting that mis-conception! This book is an invaluable aid to the newsletter editor/publisher, artist, graphics programmer, or anyone who simply wants to draw, use pictures in documents, do desktop publishing, make banners, or calendars, greeting cards, certificates, posters, signs, labels, or do anything you can think of with graphics and text. *Home Publishing on the TI-99/4A* gives you all the information you need to find the programs that do what you need to do, to use several programs together to accomplish a project, and even how to do paste-up for complicated work. Reading the in-depth evaluations of the popular graphics programs available alone might save you more money than the book costs! Written by well-known author Harry Brashear, *Home Publishing on the TI-99/4A* is the product of extensive research and years of practical knowledge gained by editing the highly respected Western New York 99'ers newsletter. Very readable, this book is both entertaining and practical.

Includes a disk full of useful little publishing utilities, and supplementary material. 110 pages. Highly recommended, and a 99/4A best-seller!

FT-02 - Text - \$12.95 + \$2.00 S&H

NEW The Communicating Computer

Did you know that computers can communicate with each other? You may have had some vague idea that it could be done, but had neither the time or a reason to learn anything more about how. Now, for the first time, there is an introductory book that will help you understand the world of computer communications! *The Communicating Computer* is not for "hackers" or experts, but instead is for the average user. There are no lengthy discussions or technical jargon, just facts and information in easy-to-read layman's language that will get you started on the road to understanding how to get tons of free software and advice over your telephone! Includes free Compuserve subscription and \$15 usage credit (\$20.00 value!). 105 Pages, soft-bound. By Ron Albright.

FT-05 - Text - \$9.95 + \$2.00 S&H

NEW V9938 Technical Data Book

The essential reference for anyone trying to program a Geneve 9640 or a 80-column card! The V9938 Technical Data Book is produced by Yamaha, and is an extensive text on this exciting processor. Not for the beginner. 152 Pages, Soft-bound.

FT-06 - Text - \$29.95 + \$2.00 S&H
